

**QUALITY REPORT**

To be completed by the patient's clinic or participating lab.

PHONE 706-733-0130

FAX 706-736-9720

Please review the Requirements for Credit Consideration below.

Files will not be reviewed until all supplemental materials are received. Please print legibly and allow our lab up to 45 business days to process inquiries, once a complete file is received by Xytex. Remit all paperwork to [info@xytex.com](mailto:info@xytex.com).

Reporting Clinic: _____	Inseminating Physician: _____
Patient Name: _____	Person Submitting form: _____

Donor ID number: \_\_\_\_\_ Lot number: \_\_\_\_\_ Vial Date: \_\_\_\_\_  
 Product Type:  Unwashed(ICI)  WASHED(IUI)  ART  ICSI

**Specimen Handling:**

Date sample received: \_\_\_\_\_ Condition of Shipper:  Charged  Thawed (If sample arrived thawed, contact Xytex immediately)

Date sample thawed: \_\_\_\_\_ Method of thawing?  RT how long? \_\_\_\_\_  
 37°C H<sub>2</sub>O bath how long? \_\_\_\_\_  
 Other: \_\_\_\_\_ how long? \_\_\_\_\_

Was sample mixed before evaluation?  Yes  No

Was any processing performed prior to evaluation?  Yes  No If yes, describe \_\_\_\_\_

Was sample evaluated on a warm counting chamber?  Yes  No

Counting chamber used:  Makler  Hemocytometer  Disposable slide (Leja, MicroCell, Cell-Vu, etc)

Counting method used:  Manual  CASA Kinetics:  (4) Excellent  (3) Good  (2) Fair  (1) Poor

**Makler/Hemocytometer Calculation:**

$$\frac{\text{Volume (mL)}}{\text{Sperm Concentration (M/mL)}} \times \frac{\text{Motility (\%)}}{\text{Total Motile Concentration in vial (M)}} =$$

**IF DISPOSABLE COUNTING CHAMBER USED:**

$$\frac{\text{Total Motile Concentration in vial (M)}}{\text{Corrected Total Motile Concentration in vial (M)}} \times 1.3 \text{ (Conversion factor*)} =$$

Was the unit used for insemination:  Yes  No

Was any processing performed on the semen after evaluation by your lab prior to insemination?  Yes  No

If yes, describe \_\_\_\_\_

Is the patient pregnant?  Yes  No  HCG lab report attached  Patient Reported

Type of assisted reproduction:  ICI  IUI  IVF  ICSI

Comments: \_\_\_\_\_

I attest to the accuracy of the above information:

_____ Submitter's Signature	_____ Date
--------------------------------	---------------

**REQUIREMENTS FOR CREDIT CONSIDERATION**

- Supporting documentation must be submitted *within 45 days of sample thaw*, including specimen processing/andrology report and pregnancy test results. If sample was used in an IVF procedure, please include the fertilization report.
- Specimen must be thawed according to Xytex protocols (included with each shipment).
- Specimens stored at the clinic longer than 60 days prior to thawing will not be considered.
- Specimen must be evaluated with a quantitative analytical method upon a warmed counting chamber prior to any processing or manipulation being applied; Xytex acknowledges up to a 25% variation between laboratories.
- Quality Reports for inseminations with Xytex donor sperm specimens resulting in a positive pregnancy test will not be considered.
- Quality Reports for IVF cycles without a transfer having achieved fertilization with a Xytex donor sperm specimen will not be considered.

\*conversion based on evidence that disposable slides display reproducible results 30% lower than Makler Chamber
